Basic Machine with One Turntable

Basic Machine with One Turntable and Two Spindles

Basic Machine with Dual Turntables and Four Spindles

Basic Machine with One Traversing Turntable One 48" Turntable and Two Spindles

48" Turntable, 2-Spindle Machine, Standard Turntable, 4-Spindle Machine, Traversing Turntable

As the exclusive distributor of Marion Engineering and Technology Core-Matic® Coring Machines, Press-Seal Gasket is excited to present the Next Generation of Core-Matic's® that are Smarter, Faster, Safer creating "The New Standard in Productivity". Our next generation of Core-Matic's® is based on an in-line modular bi-directional design. This allows you to customize a machine for your specific needs today while economically expand tomorrow and beyond as your company and coring requirements grow and change.

Some of the customization and future upgrades include:

- Choice of 60" and/or 90" turntables (additional sizes available upon request)
- Choice of number of turntables, one, two, three or four including the option to core two holes in the same structure at once
- Choice of traversing turntable for coring parallel holes
- Choice of number of core bit spindles from one to eight

See the Core-Matic® Smarter, Faster, Safer features on the back page. Please contact us to discuss how we can customize a Core-Matic® for your needs.

NEW GENERATION CORE-MATIC®

Providing products and services that protect our planet's clean water supply.

Smarter, Faster, Safer
“The New Standard in Productivity”

---Smarter---

- Automatic bit retract
- Automatically detect & correct “stuck bit situation”
- Readouts in both inches and metric units
- Modular design allows you to expand machine capabilities at anytime

---Faster---

- Semi-automatic coring
- Automatic core pressure setting
- Bi-directional drilling
- Ability to core two straight through holes in the same structure at once
- Built in encoder for precise drill carriage location at all times
- Traversing turntable for coring parallel holes

---Safer---

- Cordless remote
- Emergency stop button on cordless remote
- Barrier guarding added to address OSHA concerns
- No steps to trip on with floor mounted operator control panel
- Stand alone operator control panel mounts away from the machine
- Audible alarm sounds when carriage reverses direction
